

Review Instructions For The Summer

It's extremely important to continue learning every day during the summer. The learning habits that are developed now will affect our entire lives. In addition, by learning throughout the summer, we'll keep and strengthen the skills we gained during the past school year. I strongly encourage everyone to learn at least 1 משנה, 3 פסוקים, and 1 פרש"י every day. For משנה, one can choose to review יומא or חגיגה, or choose a different מסכתא. For חומש, one can review the פרשיות we learned or pick one of the action packed summer פרשיות. It's okay to use a translated משנה and a translated חומש. As long as you're learning, you're accomplishing. Fill in the following chart to keep track of your learning.
